Stevie Ray Vaughan

Start with P02 for attack and drive, P05 for a clearer clean, and P12 for fuzz and vibe. The amp and cabinet choices approximate the roles heard on the records using the models available in each build.

John Mayer & Albert King

Compare P21 for clean headroom, P22 for edge and ambience, and P31 or P32 for direct attack. The local Two-Rock TS1 represents one amp voice in Mayer's multi-amp approach. The public build uses shared public voices.

King recalled using Acoustic and Roland solid-state stage amps. The dry Fender-based BluesBox voice is a tonal stand-in for that direct attack. Most King presets keep the drive and modulation bypassed.

Browse from Play: turn to the preset number, push, turn to preview, then push to load. PUSH loads and stays in the list. Tap HOME to return to PLAY. Hold HOME for Settings, including input gain, levels, footswitch mode, tuner mute and global output EQ.

In Stomp mode, left toggles group A and right toggles group B. Save group assignments with the preset. Hold both footswitches for the tuner. Saved presets take priority over the factory bank.
